📍 Mumbai

Professional Summary

QA Automation Engineer with 3.5+ years of experience in Manual and Automation Testing of web applications. Hands-on expertise in Playwright using JavaScript, Selenium WebDriver using Java, TestNG, BDD Cucumber, and Hybrid Framework development. Skilled in test automation, defect management, Agile methodologies, Git, Jenkins, and JIRA. Passionate about improving software quality and accelerating delivery through robust automation solutions.

Skill

- | | |
|-------------------------|--|
| • Playwright | • Selenium WebDriver |
| • JavaScript | • Core Java |
| • Hybrid Framework | • POM (Page Object Model) Design Pattern |
| • TestNG | • BDD Cucumber |
| • Jenkins CI/CD | • GitHub |
| • ScrumDo / JIRA | • Agile |
| • Sanity Testing | • Regression Testing |
| • SDLC | • STLC |
| • API Testing (Postman) | • Cross-Browser Testing |

Work Experience

Working as a **QA Automation Engineer** at Paramatrix Technologies from Feb 2023

Professional Synopsis

- Strong experience in **Manual and Automation Testing** of web applications using **Playwright with JavaScript** and **Selenium WebDriver with Java**.
- Hands-on experience in designing, developing, and maintaining **Hybrid Automation Frameworks**, utilizing **Page Object Model (POM)** design principles and reusable automation components.
- Skilled in **Functional, Smoke, Sanity, Regression, GUI, and Cross-Browser Testing**, ensuring application quality and reliability.
- Proficient in analyzing business requirements, creating test scenarios, identifying automation opportunities, and developing scalable automation solutions.
- Strong exposure to **API Testing** using **Postman**, defect management using **JIRA/ScrumDo**, and validation of front-end and back-end application components.
- Thorough understanding of **SDLC, STLC, Agile Methodologies**, and the **Bug Life Cycle**, with active participation throughout the testing process.

- Experienced in using **GitHub**, **Jenkins CI/CD**, and **Maven** for source control, build management, and automated test execution.
- Strong analytical, problem-solving, and collaboration skills with proven ability to work effectively with developers, business analysts, and stakeholders to deliver high-quality software solutions.

Project #1

Project Title: Alis

Domain: Insurance

Roles & Responsibility:

- Performed **Manual** and **Automation Testing** for insurance policy management, customer onboarding, quotation generation, policy issuance, claims processing, and administrative workflows.
- Developed and maintained automation test scripts using **Selenium WebDriver**, **Java**, **TestNG**, and **BDD Cucumber**, ensuring comprehensive test coverage and reduced manual effort.
- Applied **Core Java**, **Object-Oriented Programming (OOP)** concepts, and the **Page Object Model (POM)** design pattern to build reusable, scalable, and maintainable automation frameworks.
- Designed and executed **Functional**, **Smoke**, **Sanity**, and **Regression Testing** scenarios based on business requirements and **SDLC/STLC** processes.
- Created **Gherkin** feature files and step definitions using **Cucumber** to support business-readable test scenarios and automated execution.
- Generated detailed test execution reports using **Extent Reports** and maintained requirement traceability to ensure complete validation coverage.
- Integrated automation suites with **Jenkins CI/CD** pipelines and managed source code using **Git** and **GitHub**.
- Collaborated with developers, business analysts, and QA teams in **Agile** environments to track defects using **ScrumDo** and ensure successful product releases.

Project #2

Project Title: FurniCart

Domain: Ecommerce

Roles & Responsibility:

- Performed **Manual** and **Automation Testing** for customer and admin modules, covering product catalog management, search functionality, cart operations, checkout, payment processing, order tracking, and inventory management.
- Developed and maintained automated test scripts using **Playwright** with **JavaScript**, ensuring reliable validation of critical end-to-end business workflows.
- Designed and implemented a **Hybrid Automation Framework** utilizing **Playwright**, **JavaScript**, and the **Page Object Model (POM)** design pattern to improve framework scalability, maintainability, and code reusability.
- Created and maintained **BDD Cucumber** feature files and step definitions to support business-readable test scenarios and automated execution.
- Automated **Smoke**, **Sanity**, **Regression**, and **Cross-Browser Testing** suites using **Playwright**, ensuring application quality across **Chromium**, **Firefox**, and **WebKit** browsers.
- Leveraged advanced **Playwright** capabilities such as **Auto-Waits**, **Locators**, **Assertions**,

- **Screenshots**, and **Tracing** to improve test reliability and reduce flaky executions.
- Generated detailed execution reports using **Allure Reports**, integrated automation suites with **Jenkins CI/CD**, and managed source code using **Git** and **GitHub**.
- Collaborated with developers and stakeholders in an **Agile** environment to analyze requirements, track defects, improve test coverage, and ensure high-quality software releases.

Educational Details

- Completed B.Tech from Nagpur University in 2021 with **7.52 CGPA**.
- Completed Diploma from Nagpur University in 2018 with **68%**.
- HSC Completed from Nagpur Board in 2016 with **79.69%**.
- SSC Completed from Nagpur Board in 2014 with **64.80%**.
