📍 Mumbai

Professional Summary

QA Automation Engineer with 3.5+ years of experience in Manual and Automation Testing of web applications. Hands-on expertise in Playwright using JavaScript, Selenium WebDriver using Java, TestNG, BDD Cucumber, Gherkin, and Hybrid Framework development. Skilled in test automation, defect management, Agile methodologies, Git, Jenkins, and JIRA. Passionate about improving software quality and accelerating delivery through robust automation solutions.

Skill

- | | |
|-------------------------|--|
| • Playwright | • Selenium WebDriver |
| • JavaScript | • Core Java |
| • Hybrid Framework | • POM (Page Object Model) Design Pattern |
| • Gherkin | • BDD Cucumber |
| • Jenkins CI/CD | • GitHub |
| • ScrumDo / JIRA | • TestNG |
| • Sanity Testing | • Regression Testing |
| • SDLC | • STLC |
| • API Testing (Postman) | • Cross-Browser Testing |

Work Experience

Working as a **QA Automation Engineer** at Paramatrix Technologies from Feb 2023

Professional Synopsis

- Strong experience in **Manual Testing** and **Automation Testing** of web applications using **Playwright** with **JavaScript** and **Selenium WebDriver** with **Java**.
- Hands-on experience in designing, developing, and maintaining **Hybrid Automation Frameworks** using the **Page Object Model (POM)** design pattern and reusable automation components.
- Hands-on experience in implementing **BDD Cucumber** frameworks by creating and maintaining **Gherkin Feature Files**, writing **Step Definitions**, and automating business scenarios for improved collaboration between technical and non-technical stakeholders.
- Proficient in analyzing **Business Requirements**, reviewing **User Stories** and **Acceptance Criteria**, creating **Test Scenarios**, identifying automation opportunities, and developing scalable automation solutions.

- Skilled in **Functional Testing**, **Smoke Testing**, **Sanity Testing**, **Regression Testing**, **GUI Testing**, **Cross-Browser Testing**, and **End-to-End (E2E) Testing**, ensuring application quality and reliability.
- Strong exposure to **API Testing** using **Postman**, **Defect Management** using **JIRA/ScrumDo**, and validation of both **Front-End** and **Back-End** application components.
- Thorough understanding of the **Software Development Life Cycle (SDLC)**, **Software Testing Life Cycle (STLC)**, **Agile Methodologies**, the **Bug Life Cycle**, and experience working in **Agile Scrum** teams throughout the software testing lifecycle.
- Experienced in using **GitHub**, **Jenkins CI/CD**, **Maven**, and **TestNG** for **Source Control**, **Build Management**, **Continuous Integration (CI)**, and **Automated Test Execution**.
- Strong **Analytical**, **Problem-Solving**, and **Collaboration** skills with proven ability to work effectively with **Developers**, **Business Analysts**, **Product Owners**, and **Stakeholders** to deliver high-quality software solutions.

Project #1

Project Title: Alis

Domain: Insurance

Roles & Responsibility:

- Strong experience in **Manual Testing** and **Automation Testing** of web applications using **Playwright** with **JavaScript**, delivering reliable and scalable end-to-end automation solutions.
- Hands-on experience in designing, developing, and maintaining **Hybrid Automation Frameworks** using **Playwright**, **JavaScript**, and the **Page Object Model (POM)** design pattern with reusable automation components.
- Experienced in automating **Functional**, **Smoke**, **Sanity**, **Regression**, **GUI**, and **Cross-Browser Testing** across **Chromium**, **Firefox**, and **WebKit** browsers using **Playwright**.
- Proficient in analyzing **Business Requirements**, creating **Test Scenarios**, identifying automation opportunities, and developing maintainable **Playwright** automation scripts for critical business workflows.
- Hands-on experience with **Playwright** features such as **Auto-Waits**, **Locators**, **Assertions**, **Browser Contexts**, **Screenshots**, and **Tracing** to improve test stability and minimize flaky executions.
- Strong exposure to **API Testing** using **Postman**, **Defect Management** using **JIRA/ScrumDo**, and validation of **Front-End** and **Back-End** application functionality.
- Thorough understanding of the **Software Development Life Cycle (SDLC)**, **Software Testing Life Cycle (STLC)**, **Agile Methodologies**, and the **Bug Life Cycle**, with active participation in sprint planning, test execution, and defect tracking.
- Experienced in using **GitHub**, **Jenkins CI/CD**, **Node.js**, **npm**, and **Allure Reports** for source control, dependency management, continuous integration, reporting, and automated test execution.
- Strong analytical, **Problem-Solving**, and **Collaboration** skills with proven ability to work effectively with **Developers**, **Business Analysts**, and **Stakeholders** to deliver high-quality software solutions.

Project #2

Project Title: FurniCart

Domain: Ecommerce

Roles & Responsibility:

- Performed **Manual** and **Automation Testing** for customer and admin modules, covering product catalog management, search functionality, cart operations, checkout, payment processing, order tracking, and inventory management.
- Developed and maintained automated test scripts using **Selenium WebDriver** with **Java**, ensuring reliable validation of end-to-end business workflows.
- Designed and maintained a **Hybrid Automation Framework** using **Selenium WebDriver**, **Java**, **TestNG**, and the **Page Object Model (POM)** design pattern to improve test maintainability and code reusability.
- Implemented **BDD Cucumber** by creating and maintaining **Gherkin Feature Files** that captured business requirements in a readable **Given-When-Then** format.
- Developed reusable **Step Definition** classes to map Gherkin scenarios with Selenium automation scripts and ensure effective test execution.
- Configured and maintained **Runner Classes** and **Hooks Classes** to manage test execution, reporting, browser initialization, and pre/post execution activities.
- Automated **Smoke, Sanity, Regression, and Cross-Browser Testing** suites using **Selenium WebDriver**, ensuring application stability across multiple browsers.
- Utilized Selenium synchronization techniques such as **Explicit Waits**, **Implicit Waits**, and advanced **WebDriver** operations to build stable and reliable automation scripts.
- Executed automation suites using **TestNG**, generated execution reports, integrated test execution with **Jenkins CI/CD**, and managed source code using **Git** and **GitHub**.
- Collaborated with Business Analysts, Developers, and QA team members in an **Agile** environment to analyze requirements, review user stories, log defects in **JIRA**, and deliver high-quality software releases.
